Please note: This comparison chart is an interpretation of findings only! It does not intend to present itself as the full authority / expert opinion regarding this comparison. Data within was compiled through the analysis of public information and the development of perceptions based on the features and benefits reviewed. The interpretation is not intended to speak for all individuals who endeavor to compare different products like those listed above, nor does it intend to sway opinion from one product to another. For this and many comparisons, individuals should form their own opinions when viewing information for different products.

The contractor should obtain approval for any substitution before board is supplied to the job.

* For fire-rated board, the user should confirm that Continental is listed for use in the specified UL design.

** USG FibeRock VHI does not meet Level 1 abrasion resistance.
