

Continental Building Products Gypsum Board and Joint Compound are Asbestos Free

To: Whom It May Concern

Asbestos is not used in the manufacture of Continental Building Products gypsum board or joint compound products.

On the packaging of our joint compound products, under ingredients it is stated "Asbestos Free".

The submittal sheets for all gypsum board product types under the heading "Physical Characteristics" state "Asbestos free".

Results of testing of gypsum board samples from all of our plants for asbestos by Polarized Light Microscopy (PLM) resulted in "None Detected".

A handwritten signature in black ink, appearing to read "Christian Chinsio".
